Growing Each Other Up
When Our Children Become Our Teachers
Sara Lawrence-Lightfoot

“[Lawrence-Lightfoot] teaches us that when we open our mouths to speak, we should be sure that our ears, our minds, and our hearts are open too. This may be the key to being a successful parent, and also to being a successful teacher, doctor, or supervisor.”—Barry Schwartz, author of The Paradox of Choice

“I will never think in the same old way about my relation to my four children and my four grandchildren.”—Howard Gardner, Harvard University

Schooling Selves
Autonomy, Interdependence, and Reform in Japanese Junior High Education
Peter Cave

“Cave robustly challenges the persistent view of Japanese junior high schools as unchanging institutions that serve primarily to prepare children for a life focused on group rather than individual activity.”—Roger Goodman, author of Children of the Japanese State

“An insightful longitudinal ethnographic study of how Japanese junior high schools have interpreted, and struggled to implement, national reform policies to promote individual autonomy.”—Kaori H. Okano, La Trobe University

Education and Equality
Danielle Allen

“Allen boldly confronts the core question about education in a democratic society: What is its essential purpose? Only after answering that question can we move to the next question: What kind of education should we deliver? Her answers are deep yet pragmatic. Only by enabling students to develop their capacities, particularly in language, can we ready them for the work of citizens.”—Hunter R. Rawlings III, president of the Association of American Universities

Have a Little Faith
Religion, Democracy, and the American Public School

“This book offers a balanced and necessary look at the different sides of the issue.”—Walter Feinberg, coauthor of For the Civic Good

The Ambitious Elementary School
Its Conception, Design, and Implications for Educational Equality
Elizabeth McGhee Hassrick, Stephen W. Raudenbush, and Lisa Rosen
“A great school is much more than a collection of excellent teachers laboring in their separate classrooms. This wonderfully clearheaded book describes how one school achieved success by building a highly collaborative culture and organization that supports teachers learning from one another and from evidence on every student’s progress, and it shows readers what it will take to make that success spread.”—Michael S. McPherson, President of the Spencer Foundation
2017 240 p. 6 x 9 7 halftones, 13 tables

Intersectional Inequality
Race, Class, Test Scores, and Poverty
Charles C. Ragin and Peer C. Fiss
“Ragin’s substantial corpus of research has demonstrated how QCA and related methods can be used with small and moderate size data sets. . . . He shows how these methods cannot only be applied to large data sets, but to a central problem of sociology—the prediction of poverty.”—Christopher Winship, Harvard University
“An original and substantive contribution to the Bell Curve debate, offering a methodological guide to those who wish to apply set theoretic methods to survey data.”—Barry Cooper, University of Durham
2016 192 p. 6 x 9 9 line drawings, 46 tables

A Companion to John Dewey’s Democracy and Education
D. C. Phillips
“Infused with charming and revealing accounts of his personal experiences as a student, high school science teacher, and professor and Dewey scholar, Phillips has written a book that will guide both newcomers to and veteran readers of Democracy and Education. The companion is also much more fun to read than Dewey’s foundational but too often turgid tome!”—Harvey Siegel, University of Miami
“A fine companion on the anniversary of the publication of a most important book.”—Walter Feinberg, University of Illinois at Urbana-Champaign
2016 184 p. 5 1/2 x 8 1/2

Teaching Evolution in a Creation Nation

2013 208 p. 6 x 9

**The PhDictionary**
A Glossary of Things You Don’t Know (but Should) about Doctoral and Faculty Life

A Perfect Mess
The Unlikely Ascendancy of American Higher Education
David F. Labaree

The Capitalist University
Henry Heller

“A welcome successor to Thorstein Veblen’s classic The Higher Learning in America. Heller carefully explains how the university system is used to shape students and society as a whole to reinforce and expand the influence of capitalism. The Rise of the Research University
A Sourcebook
Edited by Paul Reitter, Chad Wellmon, and Louis Menand

“Charts how unpredictable and unstable university systems have been on both sides of the Atlantic Ocean. It reveals that academic soul-searching about the role of research universities is as prevalent now as it was 150 years ago. But it also shows how important these bodies remain, in both the United States and Europe, in advancing understanding of the world.”—Nature

Parenting to a Degree
How Family Matters for College Women’s Success
Laura T. Hamilton
“Parenting beyond the age of 18 matters more than ever because how parents approach their children’s undergraduate years shapes the life chances of young adults, and can set them on markedly different trajectories. But what this study also reveals is the extent to which universities depend, in part, on the availability of parental support and labour to ensure that students successfully complete their degrees.”—Times Higher Education

Connecting in College
How Friendship Networks Matter for Academic and Social Success
Janice M. McCabe
