**Capitalism and Freedom**

Milton Friedman

How can we benefit from the promise of government while avoiding the threat it poses to individual freedom? In this classic book, Milton Friedman provides the definitive statement of an immensely influential economic philosophy—one in which competitive capitalism serves as both a device for achieving economic freedom and a necessary condition for political freedom.

First published in 1962, Friedman’s *Capitalism and Freedom* is one of the most significant works of economic thought ever published. Enduring in its eminence and esteem, it continues to inform economic thinking and policymaking around the world. This new edition includes a new foreword by Binyamin Appelbaum, lead economics writer for the *New York Times* editorial board.

**Big Med**

Megaproviders and the High Cost of Health Care in America

David Dranove and Lawton Robert Burns

There is little debate that healthcare in the United States is in need of reform. But where should those improvements begin? In *Big Med*, Dranove and Burns argue that we’re overlooking the most ubiquitous cause of our costly and underperforming system: megaproviders—the expansive healthcare organizations that have become the face of American medicine.

“For years, allies of big medicine have argued that Bigger is Better. Dranove and Burns take on that argument and show it is not true. They point out how big medicine is failing, and how it can be reformed. This book is wonderfully informed and thoughtfully presented.”—David Cutler, Harvard University

**Milton Friedman and Economic Debate in the United States, 1932–1972**

Edward Nelson

“Nelson’s entertaining and thought-provoking book is a treasure trove of information about Milton Friedman and the economic debates he engaged in. It is an essential reference for those interested in Friedman, his ideas, and his times. Even readers familiar with Friedman’s work will be sure to find new facts in Nelson’s book, such as the fascinating account of the ups and downs of Friedman’s career, which led Friedman to win the Clark Medal and the Nobel Prize for completely separate bodies of work.”—Emi Nakamura, University of California, Berkeley

“Will be the definitive book on Milton Friedman for a long time to come.”—Michael Bordo, Rutgers University

Leave Me Alone and I’ll Make You Rich
How the Bourgeois Deal Enriched the World
Deirdre Nansen McCloskey and Art Carden
Leave Me Alone and I’ll Make You Rich draws in entertaining fashion on history, economics, literature, philosophy, and popular culture, from growth theory to the Simpsons. It is the perfect introduction for a broad audience to McCloskey’s influential explanation of how we got rich. At a time when confidence in the economic system is under challenge, the book mounts an optimistic and persuasive defense of liberal innovism, and of the modern world it has wrought.

“There is nobody writing today who mixes erudition and eloquence, or wit and wisdom as richly as McCloskey. . . . This is the book I want all young people to read to understand how and why they are so much better off than any previous generation.”
—Matt Ridley, author of How Innovation Works

Fully Grown
Why a Stagnant Economy Is a Sign of Success
Dietrich Vollrath
“Fully Grown makes a coherent and compelling argument that American productivity growth has only mildly faltered.”—Wall Street Journal

“For Dietrich Vollrath of the University of Houston, low growth is reason for cheer. In a new book he argues that America’s growth has slowed because so much in the economy has gone so well. . . . His triumph is in showing the degree to which these [GDP numbers] make economic growth an unreliable measure of success. Attempting to capture progress in a single number is a fool’s errand.”
—Economist

Economical Writing,
Third Edition
Thirty-Five Rules for Clear and Persuasive Prose
Deirdre Nansen McCloskey
“If you want to be read (and who doesn’t) and be remembered (better yet), Economical Writing is for you. This entertaining volume will teach you how to write meaningful and joyful economics. A dose of McCloskey banishes the dismal from the ‘dismal science.’ McCloskey is the Strunk and White of economics, and Economical Writing should be required reading for all economists.”—Claudia Goldin, Harvard University

The Mismeasure of Progress  
Economic Growth and Its Critics  
Stephen J. Macekura  
“This book asks a profoundly important question: What counts as progress? Since the mid-twentieth century, the answer has been the narrow one: economic growth as measured by GDP. Although there have been genuine gains from higher incomes and innovation, this has undermined progress by undervaluing many kinds of work, increasing inequality to a socially intolerable degree, and hastening climate change and environmental degradation. Macekura argues convincingly that we need a better future and better measures.” —Diane Coyle, University of Cambridge

The Bonds of Inequality  
Debt and the Making of the American City  
Destin Jenkins  
In this deeply researched book, Jenkins reveals the world of politics and finance that lurks beneath the borrowing decisions of American cities. Focusing on San Francisco, The Bonds of Inequality uncovers how racial inequalities were intrinsically tied to banks, credit rating firms, insurance companies, and the national municipal bond market—and how these arrangements were central in determining the distribution of resources in the city. By homing in on financing and its imperatives, Jenkins boldly rewrites the history of modern American cities, revealing the hidden strings that bind debt and power, race and inequity, democracy and capitalism.

Crap  
A History of Cheap Stuff in America  
Wendy A. Woloson  
“A fascinating look at the history of cheap commodities in America and the ways they have been marketed, sold, and consumed. Woloson examines gadgets, giveaways-gifts-swag, ready-made cheap collectibles, novelties/jokes, with some terrific mini case-histories of businesses such as Woolworth’s Five and Dime, Hummel figurines, and Beanie Babies. Crap elucidates the central role that cheap goods have played in American consumer culture.” —Marita Sturken, author of Tourists of History  
2020 416 p. 6 x 9 11 color plates, 105 halftones  

America, Compromised  
Lawrence Lessig  
“Lessig lays out a working definition and theory of corruption that is at once simple and comprehensive, a devastating argument that America is racing for the cliff’s edge of structural, possibly irreversible tyranny.” —Cory Doctorow  
2018 240 p. 5 1/2 x 8 1/2 8 halftones, 1 table  

Fighting Financial Crises  
Learning from the Past  
Gary B. Gorton and Ellis W. Tallman  
“Financial crises are complex economic and political events, and a historical perspective is essential. In this book, two of our best financial historians distill the key lessons for policy makers and practitioners from the US banking crises of the nineteenth and early twentieth centuries. Their accounts of the crises are engaging and their analyses are insightful and persuasive.” —Ben S. Bernanke, former chair of the Federal Reserve

Bankrupt in America
A History of Debtors, Their Creditors, and the Law in the Twentieth Century
Mary Eschelbach Hansen and Bradley A. Hansen
“Bankrupt in America is a tour de force analysis of bankruptcy legislation and its impact over the twentieth century. It shows the interplay among state and federal legislation, economic conditions, social stigma, and the role of certain individuals in accounting for changes over time and across states. The authors offer an institutional and cliometric account that deftly draws on economics, history, law and political science. It will become the resource for many scholars, and I hope legislators.”—Lee J. Alston, Indiana University

Money, Power, and the People
The American Struggle to Make Banking Democratic
Christopher W. Shaw
“In a dazzling—dare I say gripping!—historical narrative, Shaw reminds us of the surpassing importance of finance to the people it serves. Money, Power, and the People underscores how the greatest financial innovations came in the form of institutions that were demanded and designed through the will of the American people.”—Sarah Bloom Raskin, former U.S. Deputy Secretary of the Treasury

An engaging and enlightening history of working people’s fight against big finance. Essential reading for anyone who wants to understand the evolution of banking and politics from the Gilded Age to Occupy Wall Street.”—Christina D. Romer, former chair of the Council of Economic Advisers

Probable Justice
Risk, Insurance, and the Welfare State
Rachel Z. Friedman
“Friedman powerfully brings together three traditions of thought: theory on risk and probability, ethical principles of distributive justice, and political theory on the purpose of social insurance or the welfare state. Her image of civil society as a great mutual insurer with coercive power will reorient political thinking on the welfare state.”—James Franklin, author of The Science of Conjecture

Trading Spaces
The Colonial Marketplace and the Foundations of American Capitalism
Emma Hart
“A compelling addition to the history of capitalism, Trading Spaces reminds us that globalization’s current realities have deep roots in the early modern era. Hart explores the shift from marketplaces to markets through the lens of colonization, revealing how the explosion of global trade gave rise to clashing visions about people’s interactions with markets, with consequences for both America’s independence and its capitalist future.”—Margaret Newell, author of Brethren by Natures

Smart Machines and Service Work
Automation in an Age of Stagnation
Jason E. Smith
“The technological advances of the last four decades have brought only insignificant productivity gains. This ‘productivity paradox’ remains an abiding mystery in mainstream economics. Smith removes the mystery, explaining how rates of investment, economic growth, and real wage increases have been abysmally low not despite capitalism’s technological dynamism, but because of it. This important book should be read by anyone interested in the social consequences of technological change today.”—Tony Smith, author of Technology and Capital in the Age of Lean Production

Invisible China
How the Urban-Rural Divide Threatens China’s Rise
Scott Rozelle and Natalie Hell

“No one knows rural China better than Scott Rozelle. In this brilliant, original, thought-provoking, and important study, Rozelle and Natalie Hell not only make China’s potential human capital crisis visible, but provide actionable solutions based on rigorous research.”—Hongbin Li, Stanford University

“This is the most readable and compelling economics book of the year, and probably the most important. From the opening pages, a clear and compelling argument unfolds: China faces a labor quality crisis, as hundreds of millions of young rural workers lack the education and robust health they need to participate in China’s emerging high tech economy. Nobody who cares about China can afford to ignore Invisible China.”—Barry Naughton, University of California, San Diego

Currency Statecraft
Monetary Rivalry and Geopolitical Ambition
Benjamin J. Cohen

“Currency Statecraft displays all the characteristics that have earned Cohen his reputation as the world’s leading analyst of the politics of global money: it is readable, thoughtful, fascinating, and provocative. Building on his seminal past work, Cohen highlights important relationships between international currencies, power, and geopolitical ambition. . . . A crucial read for anyone interested in the future of money in this age of geopolitical uncertainty.”—Eric Helleiner, University of Waterloo

Hume and the Rise of Capitalism
Margaret Schabas and Carl Wennerlind

“Schabas and Wennerlind demonstrate both that David Hume was one of the most important early theorists of capitalism and that economics ‘serves as a unifying thread’ in the philosopher’s life work. This book is essential reading for those interested in the history of capitalism, the Enlightenment, and the age of revolutions. It is also vital to understanding the underpinnings of modern economic debates.”—Steven Pincus, University of Chicago

Great Economic Thinkers
An Introduction—from Adam Smith to Amartya Sen
Edited by Jonathan Conlin

Great Economic Thinkers presents an accessible introduction to the lives and works of thirteen of the most influential economists of modern times: Adam Smith, David Ricardo, John Stuart Mill, Karl Marx, Alfred Marshall, Joseph Schumpeter, John Maynard Keynes, and Nobel Prize winners Friedrich Hayek, Milton Friedman, John Forbes Nash, Jr., Daniel Kahneman, Amartya Sen, and Joseph Stiglitz. Free from confusing jargon and equations, the book describes key concepts put forward by these thinkers and shows how they have come to shape how we see ourselves and our society.

From Old Regime to Industrial State
A History of German Industrialization from the Eighteenth Century to World War I
Richard H. Tilly and Michael Kopsidis

“During the nineteenth century the German economy developed into one of the most advanced in the world. Tilly and Kopsidis masterfully explain this rise to economic and technological leadership, starting with agricultural and institutional transformation in the eighteenth century and following the story through to the development, by the end of the nineteenth century, of distinctive financial institutions that supported an advanced industrial economy.”—Timothy W. The Corporate Contract in Changing Times

Is the Law Keeping Up?
Edited by Steven Davidoff Solomon and Randall Stuart Thomas

With The Corporate Contract in Changing Times, Davidoff Solomon and Stuart Thomas bring together leading corporate law scholars, judges, and lawyers from top corporate law firms to explore what needs to change and what has prevented reform thus far. Among the topics addressed are how the law could be adapted to the threat to corporations from activist hedge funds and how statutory laws could be reviewed in the wake of appraisal arbitrage. Together, the contributors surface promising paths forward for future corporate law and public policy.
