Elizabeth Catlett
A Black Revolutionary Artist and All That It Implies
Edited by Dalila Scruggs

Accomplished Black printmaker and sculptor, avowed feminist, and lifelong activist Elizabeth Catlett (1915–2012) built a remarkable career around intersecting passions for formal rigor and social justice.

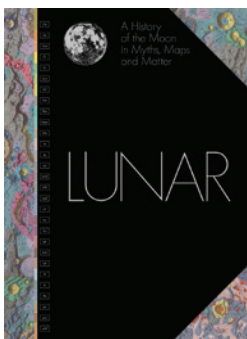

She protested the injustices of her time throughout her life. Her work in printmaking and sculpture draws on organic abstraction, the modernism of the United States and Mexico, and African art to center the experiences of Black and Mexican women. Catlett attended Howard University, studied with the painter Grant Wood, joined the Harlem artistic community, and worked with a leftist graphics workshop in Mexico, where she lived in exile after the US accused her of communism and barred her re-entry into her home country.

This book, accompanying a major traveling retrospective, offers a revelatory look at the artist and her nearly century-long life, highlighting overlooked works alongside iconic masterpieces.

The United States Governed by Six Hundred Thousand Despots

A True Story of Slavery; A Rediscovered Narrative, with a Full Biography
John Swanson Jacobs

For one hundred and sixty-nine years, a first-person slave narrative written by John Swanson Jacobs—brother of Harriet Jacobs—was buried in a pile of newspapers in Australia. A document like this—written by an ex-slave and ex-American, in language charged with all that can be said about America outside America, untampered with and unedited by white abolitionists—has never been seen before. Reproduced in full, this narrative—which entwines with that of his sister and with the life of their friend Frederick Douglass—here opens new horizons for how we understand slavery, race, and migration, and all that they entailed in nineteenth-century America and the world at large.

“The rediscovery of a long-forgotten slave narrative would be notable enough. But this one, scholars who have seen it say, is unique for its global perspective and its uncensored fury. . . .”—Jennifer Schuessler, *The New York Times*

“In Jacob’s memoir, which is accompanied by a biography by Jonathan D. S. Schroeder . . . Jacobs decides to go for broke. His writing is wry, unforgiving, and full of fury. It’s hard to take your eyes off the page.” —*Electric Lit*

Coming Out Republican

A History of the Gay Right
Neil J. Young

Coming Out Republican provides striking insight into who LGBTQ+ conservatives are, what they want, and why many of them continue to align with a party whose rank and file largely seem to hate them. As the Republican Party renews its assaults on LGBTQ+ rights, understanding the significant history of the gay right has never been more critical.

Partisan Nation

The Dangerous New Logic of American Politics in a Nationalized Era
Paul Pierson and Eric Schickler

A provocative exploration of how America's democratic crisis is rooted in a dangerous mismatch between our Constitution and today's nationalized, partisan politics.

"Noted political scientists Pierson and Schickler draw on their extensive scholarship to examine various periods of American history during which polarization was particularly virulent. . . . [*Partisan Nation*] is well researched, and the authors' analysis of past eras of polarization changes in what they label 'intermediary institutions' such as interest groups and mass media is incisive. . . . An intriguing . . . examination of the toxic American political landscape."—*Kirkus Reviews*

Shock Values

Prices and Inflation in American Democracy

Carola Binder

"*Shock Values* [is] a timely subject in this inflation-focused presidential election year. Carola Binder expounds on monetary ideas both sound and otherwise. She takes up tariffs, antitrust policy, price control, rent control, the minimum wage and the quest for the will-o'-the-wisp called 'price stability.' Her brisk narrative, starting in colonial times, carries the reader all the way down to the tumultuous present."—*The Wall Street Journal*

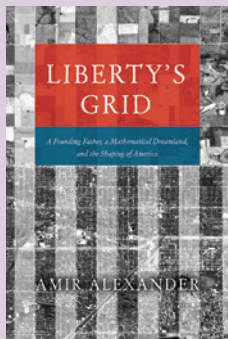

"Binder argues fluctuations in prices have 'shaped American democracy since its very beginning,' influencing the size, structure, and scope of government. . . . Binder skillfully traces America's circuitous path from a gold and silver standard to a fiat currency, as well as the nation's recurrent battles over centralized monetary power, from Andrew Jackson's war on the Second Bank of the United States in 1832 to calls for ending the Fed today. But *Shock Values* is much more than a monetary history. Many of the most illuminating sections concern non-monetary responses to price fluctuations, such as government attempts to control prices directly by setting maximum or minimum prices."—*The Financial Times*

The Great American Transit Disaster

A Century of Austerity, Auto-Centric Planning, and White Flight
Nicholas Dagen Bloom

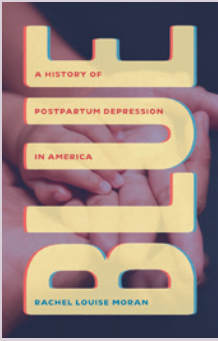

A potent re-examination of America's history of public disinvestment in mass transit.

Many a scholar and policy analyst has lamented American dependence on cars and the corresponding lack of federal investment in public transportation throughout the latter decades of the twentieth century. But as Nicholas Dagen Bloom shows in *The Great American Transit Disaster*, our transit networks are so bad for a very simple reason: we wanted it this way.

"In this excellent socioeconomic history, Bloom offers a comprehensive and thought-provoking account of the rise and fall of U.S. mass transit, skillfully assessing successes and stumbles so that we may learn from them and correct course."—*Booklist*

"American transit agencies are standing on the brink of a devastating fiscal cliff. . . . Dire though the present situation is, this is hardly the first time that transit officials have been locked in a Sisyphean struggle to maintain service levels with shrinking funding and ridership. As Bloom, a professor of urban policy and planning at Hunter College, describes in his new book, *The Great American Transit Disaster*, U.S. public transportation has lurched from one crisis to the next throughout the past century."—*Bloomberg CityLab*

Blue
A History of Postpartum Depression in America
Rachel Louise Moran

“In a narrative that sparkles with vivid oral histories, Moran offers a nuanced, perceptive, and empathetic history of postpartum mental health activism. Analyzing the delicate and savvy balancing act of activists working to rally broad support for women’s mental health in a polarized culture, *Blue* offers a case study critical to our current moment.”—Lara Freidenfelds, author of *The Myth of the Perfect Pregnancy: A History of Miscarriage in America*

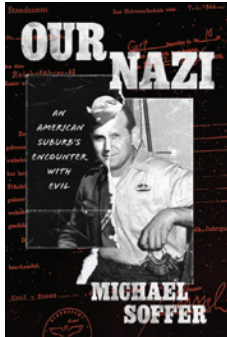

“Rachel Moran’s powerful and groundbreaking book explores how women’s activism and professional advocacy brought about increased recognition of postpartum mental illness in post-war America. Drawing on a wealth of research, particularly oral history, it highlights the complexities of this process against a backdrop of changing ideas of motherhood and family values, diagnostic confusion, and tensions between biomedical and social explanations and responses. This study is indispensable not just for historians but for anyone interested in women’s health today.”—Hilary Marland, author of *Dangerous Motherhood: Insanity and Childbirth in Victorian Britain*

The English Soul

Faith of a Nation
Peter Ackroyd

From celebrated historian and writer Peter Ackroyd, a magisterial portrayal of English Christianity over the centuries.

"Ackroyd's new book is about the evolution of Christianity in England, from the venerable Bede to Justin Welby. The book carries the title *The English Soul*, what he defines now as 'a convenient shorthand for qualities which we don't understand.' As with all of Ackroyd's books, you arrive at the end of this procession of mystics and evangelists, heretics and headbangers, briefly cleverer than when you began. His history takes in lives of a multitude of believers from Julian of Norwich, through John Donne and John Wesley, to G.K. Chesterton and C.S. Lewis, with numerous enjoyable diversions along the way."—*Observer*

How the Spanish Empire Was Built

A 400 Year History

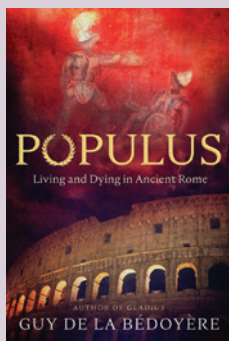

Felipe Fernández-Armesto and Manuel Lucena Giraldo

The untold story of the engineering behind the empire, showing how imperial Spain built upon existing infrastructure and hierarchies of the Inca, Aztec, and more, to further its growth.

“The world’s most successful empires have been engineers’ creations.’ This assertion, made by Fernández-Armesto and Lucena Giraldo in *How the Spanish Empire Was Built: A 400-Year History*, seems bold at first, almost audacious. Yet within the span of the book’s first two chapters, the authors’ contention seems not only logical and wise but almost irrefutable. . . . A richly researched account of the clever, industrious and deeply practical men who followed in the footsteps, often literally, of Columbus, Cortés, Pizarro, Núñez de Balboa, and others. The mission of these takers of territory was completed, the authors argue, by the engineers—makers of ‘the scaffolding . . . on which empire was erected.’”—Tunku Varadarajan, *The Wall Street Journal*

Populus

Living and Dying in Ancient Rome
Guy de la Bédoyère

This revealing look at life in ancient Rome offers a compelling journey through the vivid landscape of politics, domestic life, entertainment, and inequality experienced daily by Romans of all social strata.

“Diverting . . . *Populus* draws on such archives of the quotidian to make ancient Rome seem both wonderfully weird and convincingly real. . . . *Populus* abounds in such peeks beneath the surface of ‘official’ Rome. . . . If *Populus* works best as a smorgasbord, it is an appealing one indeed. With his wide array of sources, his eye for compelling details and his engaging prose style, de la Bédoyère keeps the reader eager for more—and wondering what strange facet of Roman life will be served up next.”—*The Wall Street Journal*

Basilisks and Beowulf Monsters in the Anglo-Saxon World

Tim Flight

“Uncharted territories were not valued for their splendor, but feared for the malign forces they hosted. Flight’s book covers the range of creatures that, in the Anglo-Saxon imagination, make their home in such landscapes. From the mysterious blemmyes, headless men with eyes on their chest, to cynocephali (literally, ‘dog-headed’), human-canine hybrids with cannibalistic tendencies, it shows how the monstrous is associated with the ‘corruption of God’s design’—or, to put it another way, creatures that are almost like humans or animals, but not quite. . . .”

Black Knights

Arabic Epic and the Making of Medieval Race
Rachel Schine

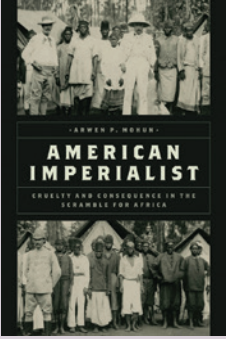

“Through close, supple analyses of popular Arab-Islamic heroic epics, Schine expertly shows how Blackness, both symbolic and real, is put to dynamic use. Her nuanced reading of female characters, shows how racialized and othered subjects benefit from inclusion in the Arab-Islamic order. *Black Knights* is indispensable for any grounded and informed understanding of the history of Blackness and racialization in premodern Islam and in the medieval world.”—Shawkat M. Toorawa, Yale University

“Schine’s *Black Knights* builds on an impressive range of scholarship to present the reader with a carefully nuanced discussion of the meanings of race in premodern Arabic popular epics that both educates and entralls. This book follows the makings of race through its relationship to gender, natural philosophy, and faith to expose the concept’s contingency but also its centrality and productivity to our understanding of Arabic culture.”

American Imperialist

Cruelty and Consequence in the Scramble for Africa
Arwen P. Mohun

"Compelling. . . This page-turner should encourage more public interest in other U.S. imperialists, including Henry Sanford, who was instrumental in founding the Free State. One also hopes that it will stimulate more work on the African collective memory of such imperialists, to assess the lasting consequences of their nefarious actions."—*Times Literary Supplement*

"Mohun further pulls back the veil on American collusion with King Leopold in his brutal rule over the Congo Free State. More specifically, she exposes the ways in which men like her great-grandfather participated in the violent subjugation of African peoples and the seizure of African lands to enrich the coffers of the Belgian monarch. In telling her ancestor's story, taking the reader from the shores of Zanzibar to Boma, Mohun reveals how Dorsey's time in Africa embodied the 'remarkable influence of American money and expertise' in imperial ventures."

Beauty and the Brain

The Science of Human Nature in Early America

Rachel E. Walker

"A highly original, insightful, and engaging book. Walker's research is groundbreaking, her analysis a model for how to produce an intellectual and cultural history, and her chapters filled with compelling evidence. By bringing together science, politics, and popular culture, Walker provides an important history of how people tried to read facial features as a mark of character for both conservative and radical purposes."—Corrine T. Sea Level

A History

Wilko Graf von Hardenberg

"Like the metre, the minute, or the meridian that runs through Greenwich, England, 'sea level' is best thought of as a social and historical construct, the result of an inherently arbitrary decision taken by generations of people doing their best to make sense of a strange and chaotic world. Von Hardenberg's history is a story not of the way sea level has changed over time but, rather, of the ways in which humans have understood, and made use of, sea level as a concept, a marker of where we stand in the world."—*The New Yorker*

The Kew Gardens Christmas Book

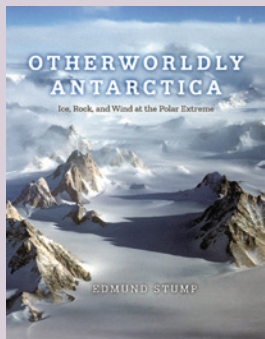

Jenny Linford

Christmas is a special festival, marked around the world each December. It is a time of year that Kew Gardens enjoys celebrating. One striking aspect of Christmas is the role played by plants, mammals, and birds—from the Christmas tree and vibrant evergreens used to decorate our homes to the reindeer and robins that are such an endearing part of the Christmas story.

The Kew Gardens Christmas Book is a beautifully illustrated celebration of the plants and animals central to Christmas. Jenny Linford weaves together history, folklore, botany, and stories about Kew, as well as a selection of delicious plant and fungi-based Christmas recipes. From the history of the Christmas tree to the intriguing story of frankincense, the book is filled with fascinating festive facts. In short, it's the perfect Christmas present.

Otherworldly Antarctica

Ice, Rock, and Wind at the Polar Extreme

Edmund Stump

"Explorer and geologist Stump went on his first research mission to Antarctica in 1970 and returned many times over the following decades. The new book *Otherworldly Antarctica* offers a selection of the photographs he took on these trips, capturing the 'innumerable forms' that ice can take. . . . Now in his seventies, he writes that if he 'had one hour more to savor Antarctica,' he'd be standing in a field of wind-carved snow 'as far as the eye could see.'"—*The Wall Street Journal*

"In captivating words, photographs, and illustrations, geologist Stump's book covers the 'stark and utterly pristine' continent where winter never leaves. . . . Stump is meditative, even spiritual, in his descriptions of his favorite place. . . . A fascinating armchair travel book, approaching the remotest place on Earth with a knowledgeable, enthusiastic, and artistic guide. It will be a standout in collections about polar exploration or landscape photography.'"—*Foreword Reviews*, starred review

Is Anyone Listening?
What Animals Are Saying to Each Other and to Us
Denise L. Herzing

From a leading researcher on dolphin communication, a deep dive into the many ways animal species communicate with their kin, their neighboring species, and us.

"Dr. Dolittle famously desired to talk to the animals. Herzing has a better idea: stop talking long enough to listen to what the animals themselves are saying. Herzing has spent more than forty years doing just that, mostly while underwater with free-living dolphins. It might surprise us to learn that animals sometimes lie and that some animals talk by changing colors. Listen to what Herzing has to say here. You'll be amazed."

Steven Shapin

What we eat, who we are, and the relationship between the two.

"'Diet' has come to mean what we eat, how many calories, how much protein or carbohydrate. Shapin gives us a cultural and medical history of how this was not always so in western countries. From the ancient Greeks until the mid-nineteenth century, diet meant a medical regimen for management of the body, in which the language of qualities, humors, and temperaments was ubiquitous in both medical practice and common parlance. In this erudite and often entertaining book, Shapin further demonstrates the persistence of centuries-old prescriptions for balance and moderation as the virtuous aim in eating and living."—Mary Jo Nye, author of *Michael Polanyi and His Generation: Origins of the Social Construction of Science*

The English Garden

Hans von Trotha

Garden design in England was entirely reinvented during the eighteenth-century. The strictly symmetrical gardens of the French Baroque were replaced by artificial landscapes which soon became almost indistinguishable from natural scenery. What continues to govern our notions of a beautiful landscape, even today, is the ideal image of Nature conceived by eighteenth-century English landscape gardeners. This journey through the history of the English garden introduces us to twelve of the most important, original and beautiful parks in Britain, all of which can be visited today. On the way, we learn how the new landscape garden was born of the spirit of political opposition.

The Northeast Corridor
The Trains, the People, the History, the Region
David Alff

“. . . a chronicle filled with reliably fascinating facts.”—*The Wall Street Journal*
“David Alff employs a historical perspective to explain how trains became essential, if frustrating, fixtures of the bustling metropolises from the Mid-Atlantic to New England. He delves into the political decision-making and compromises that made the corridor what it now is and considers how transformative planned upgrades could be.”—*Bloomberg*
“In the more than two hundred years since dreamers first proposed laying tracks along today’s Northeast Corridor, no one has tried to tell its story from the start through the present—until now. Alff weaves together an engrossing narrative of the visionary leaders, engineering feats, and fast trains that made the Northeast Corridor our nation’s most important transportation artery. *The Northeast Corridor* is a must-read for both historians and the new generation of dreamers envisioning the corridor’s future.”—Richard G. LeRoy Neiman

The Life of America's Most Beloved and Belittled Artist
Travis Vogan

The untold story of an American hustler who upset the art world and became a pop culture icon, cutting a swath across twentieth-century history and culture.

"LeRoy Neiman wanted to be taken seriously as an artist, and it troubled him that he never really was. With this well-researched, insightful, and clear-eyed biography, Travis Vogan has righted that wrong. This isn't the adulatory book Neiman would have commissioned during his life, but anyone who takes art seriously—as he did—understands that there's no greater sign of respect than to reveal one's subject for what it is. That's just what Vogan has done for Neiman and his work in these pages."—Colin Asher, author of *Never a Lovely So Real: The Life and Work of Nelson Algren*

Seeing Baya
Portrait of an Algerian Artist in Paris
Alice Kaplan

"Part biography, part microhistory, and part reverie, Alice Kaplan's *Seeing Baya* reveals a whole world in the story of one forgotten woman. By turning the lens on Baya Mahieddine, a talented Algerian painter of humble origins who made her way into the salons of Paris and the pages of *Vogue* magazine, Kaplan shows that 'seeing Baya' is seeing the true power of art—its pleasure and its promise. Against the backdrop of France's brutal colonial assault on Algeria, Kaplan recreates in painstaking detail the life and times of an artist finding her own voice, and her own life, despite the odds. An accomplished historian, Kaplan brings to this book her signature rigorous research and beautiful pen. Nothing Vast

A Novel
Moshe Zvi Marvit

"*Nothing Vast* is a rich, intelligent and lucid multigenerational narrative, spanning contexts and continents, weaving archival work with fiction, intertwining the catastrophic histories that make up the stories of nations with the small vicissitudes and moments of mercy that undergird individual lives. This book offers a compelling depiction of trauma, ideological fervor, dispossession and buried memories, both individual and collective; of the siren's call of violent nationalism, which ultimately offers a false and hollow facsimile of redemption; and of the impact of all of this on the human heart, and soul."—Moriel Rothman-Zecher, author of *Before All the World and Sadness Is a White Bird*

How to Think like a Philosopher

Twelve Key Principles for More Humane, Balanced, and Rational Thinking

Julian Baggini

More than a book of tips and tricks (or ways to be insufferably clever at parties), *How to Think like a Philosopher* is an invitation to develop the habits of good reasoning that our world desperately needs.

"In lively and engaging prose, the book distills some of history's most important philosophical ideas. . . . This is an important book. Much more than a guide to critiquing other people's arguments, it explains how we can each sharpen up our own act by becoming more attentive and—crucially—more generous in our thinking. It should be required reading for commentators, politicians, and anyone who risks becoming too enamored with their own rectitude."—*The Herald* (UK)

Social Science

Soviet Factography

Reality without Realism

Devin Fore

A study of Soviet factography, an avant-garde movement that employed photography, film, journalism, and mass media technologies.

“What does revolution require of writers, artists, photographers, and filmmakers? With extraordinary archival diligence and theoretical intelligence, Fore recovers a fascinating array of nearly lost experiments that address this question more radically than ever before or since. Revealed here are unprecedented strategies to document the factuality of a transformed world as immediately as possible—to document it without arresting it but, on the contrary, by dynamizing it anew. This study of ‘reality in revolution’ in the Soviet Union is the perfect complement to Fore’s equally masterful survey of ‘realism after modernism’ in Germany during the same period. It is also, tacitly, a powerful riposte to the purveyors of deceit and disinformation in our own time.”—Hal Foster, Princeton University

Ylla

The Birth of Modern Animal Photography

Pryor Dodge

Ylla (1911–55) devoted herself exclusively to animal portraiture at a time when no one had thought of only photographing animals. Driven by her symbiotic relationship with animals, she created a new genre in animal photography: the expression and personality in animals. *Ylla: The Birth of Modern Animal Photography* recounts the eventful odyssey of a “New Woman” par excellence, fearless and knowing no limits. She was part of artists’ circles in Belgrade and Paris, however during WWII she fled to New York via Marseille where she started her career again from square one. Originally taking beguiling photos in her studio and zoos, Ylla finally traveled to Africa and India where she died in a tragic accident during a water buffalo race. Her *Animals in Africa* and *Animals in India* are some of the first books on the subject. Ylla also introduced photography to

children’s literature. Her books *The Sleepy Little Lion* and *Two Little Bears* are juvenile classics. This book details her remarkable life and work.

Viktor&Rolf

Fashion Statements

Edited by Thierry-Maxime Loriot

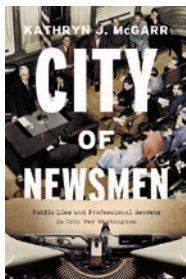

For over three decades, Viktor Horsting and Rolf Snoeren have pushed the boundaries between haute couture and art with their avant-garde luxury fashion house, Viktor&Rolf. This book showcases one hundred of their most daring couture creations, celebrated by icons like Madonna, Tilda Swinton, and Lady Gaga, and features collaborations with renowned visual artists such as Ellen von Unwerth, Andreas Gursky, and Cindy Sherman. Accompanied by insightful essays and an interview with the designers, this volume offers an in-depth exploration of Viktor&Rolf's unique vision, where fashion becomes wearable art, blurring the lines between creativity and couture.
